## KENYATAAN TIMBALAN PENGERUSI

### EKONOMI MALAYSIA

Ekonomi Malaysia telah mencatatkan pertumbuhan sebanyak 4.5% bagi suku tahun keempat tahun 2009. Penggunaan swasta yang mapan dan perbelanjaan sektor awam yang meningkat menyumbang kepada permintaan domestik yang lebih tinggi. Pelaksanaan langkah rangsangan fiskal yang pesat merupakan faktor utama yang menyumbang kepada pemulihian ekonomi negara.

Sektor awam dilaporkan terus memainkan peranan utama dalam merangsang pertumbuhan di mana perbelanjaan penggunaan sektor awam meningkat sebanyak 1.3% sementara perbelanjaan modal sektor awam meningkat dengan lebih ketara berikutan pelaksanaan projek di bawah pakej rangsangan fiskal yang lebih giat.

Malaysia juga turut dilaporkan terus menerima pelaburan asing dengan aliran masuk kasar meningkat kepada RM7.2 bilion berbanding RM6.7 bilion pada suku ketiga, dengan sejumlah besar Pelaburan adalah untuk sektor Perkilangan dan Perkhidmatan. Sementara itu, sektor Perkhidmatan mencatat pertumbuhan yang menyeluruh dengan pertumbuhan yang lebih tinggi dalam hampir kesemua sub sektor.

Pemulihan ekonomi global turut dilaporkan menjadi bertambah baik pada suku keempat 2009 dan trend positif ini dijangka berterusan hingga ke tahun 2010.

### PRESTASI KEWANGAN

Tahun 2009 menyaksikan BSN terus memperkuatkannya kedudukannya sebagai sebuah Bank yang lebih berdaya saing dari segi pencapaian kewangan di samping terus memperkasakan peranan sosialnya demi kesejahteraan pelanggan-pelanggannya. BSN telah merekodkan prestasi kewangan yang baik dengan keuntungan operasi sebelum cukai sebanyak RM467 juta, peningkatan sebanyak 100.4% berbanding tahun 2008.

Bank telah berjaya meraih keuntungan dan terus membina asas yang kukuh untuk merealisasikan matlamat jangkama panjang untuk menjadi bukan sahaja institusi simpanan utama negara malah sebuah institusi kewangan yang berdaya maju dan bersaing dengan institusi komersial tempatan.

Bagi tahun kewangan 2009, jumlah pendapatan BSN telah meningkat sebanyak 16.1% kepada RM1,209 juta daripada RM1,041 juta pada tahun kewangan yang sebelumnya. Pertumbuhan ketara/signifikan ini banyak disumbangkan oleh aktiviti Pelaburan dan aktiviti Penyimpan dan Pendahuluan. Pinjaman Persendirian merupakan penyumbang terbesar kepada peningkatan dalam asset portfolio Bank dan seterusnya kepada keuntungan sebelum cukai bagi tahun 2009. Jumlah Pinjaman Persendirian dan Perumahan telah meningkat sebanyak 19.0% pada tahun 2009.

## Kenyataan Timbalan Pengurus

Peningkatan di dalam jumlah Pinjaman Persendirian telah menjadi faktor utama di dalam pertumbuhan jumlah pinjaman yang telah meningkat dengan kukuh sebanyak RM1,265 juta atau 27.2% kepada RM5,908 juta pada akhir tahun 2009.

Portfolio Pinjaman dan Pembiayaan Bank juga menunjukkan pertumbuhan di mana ia meliputi 49.2% daripada jumlah aset. Hasilnya, aktiviti pembiayaan kekal teguh dengan menyaksikan pembiayaan berlandaskan Islam meningkat dengan ketara sebanyak RM1,014 juta kepada RM4,296 juta pada akhir tahun 2009. Pencapaian ini menguatkan lagi keyakinan BSN terhadap keupayaan BSN untuk terus menunjukkan prestasi yang positif di dalam Perbankan Islam di samping menyumbang kepada pertumbuhan sistem Kewangan Islam di Malaysia.

Di samping itu, dalam memastikan Bank terus mengawal selia kedudukan Pembiayaan Tidak Berbayarnya, usaha dalam mempertingkatkan Pengurusan Risiko melalui penilaian kredit dan usaha pungutan hutang masih diteruskan. Klinik Kredit yang diperkenalkan oleh BSN sebagai salah satu usaha untuk membantu pelanggan yang mempunyai masalah dalam membayar pinjaman ketika krisis ekonomi juga menjadi salah satu faktor dalam pengawalan Pinjaman Tidak Berbayarnya. Usaha-usaha tersebut telah berjaya membantu BSN mengurangkan kadar Pembiayaan Tidak Berbayar Kasar ("Gross Non Performing Loan") daripada 8.1% (2008) kepada 6.0% (2009) manakala Pembiayaan Tidak Berbayar (Net Non Performing Loan) mengalami sedikit peningkatan dari 1.5% pada tahun 2008 kepada 1.8% pada tahun 2009.

Jumlah pendeposit runcit BSN meningkat sebanyak RM807 juta atau 7.8% kepada RM11,109 juta bagi tahun berakhir 2009 di mana peningkatan ini disumbangkan oleh produk-produk seperti GIRO sebanyak RM101 juta atau 2.0%, Simpanan Tetap (STT) sebanyak RM92 juta atau 6.5%, Sijil Simpanan Premium (SSP) sebanyak RM303 juta atau 30.6%, Mudharabah sebanyak RM198 juta atau 9.1% dan GIRO-i sebanyak RM103 juta atau 17.0%.

Sebagai sebuah Bank Komuniti, Bank terus melaburkan dananya dengan memberikan kepentingan kepada penyediaan akses kepada kemudahan perbankan dan kewangan kepada segenap lapisan masyarakat terutamanya di kawasan luar bandar dan pendalam.

Inisiatif ini menyaksikan BSN membuka beberapa cawangan baru seperti di Setia Alam, Selangor, Bandar Sri Iskandar dan Changkat Jering, Perak serta cawangan sosialnya di Song, Sarawak.

Bank juga telah memperluaskan perkhidmatan Unit Bank Bergeraknya (UBB) ke Sarawak yang meliputi kawasan seperti Kuching dan Bekenu (Zon Miri). Program Rasionalisasi masih diteruskan dengan usaha untuk menaiktaraf, pengabungan cawangan dan mengenalpasti serta menempatkan cawangan-cawangan yang terpilih ke lokasi yang lebih strategik. Sehingga Disember 2009, BSN mempunyai rangkaian cawangan sebanyak 376,735 Mesin Teller Automatik dan 81 buah Mesin Deposit Tunai di seluruh Negara.

Portfolio Mikro Kewangan BSN juga telah berkembang dengan signifikan di mana pada tahun berakhir 2009, BSN telah membuat pengeluaran sebanyak RM106 juta. Skim ini dikenalpasti sebagai salah satu skim untuk membantu usahawan-usahawan kecil lebih berdaya maju dan bersaing di dalam dunia perniagaan mereka yang memerlukan modal kerja dan kemahiran Teknikal. BSN terus komited untuk menawarkan kemudahan Mikro Kewangan kepada usahawan-usahawan kecil dengan membuka lebih banyak Pusat Mikro Kewangan bagi mempermudahkan proses permohonan dan kelulusan. Kaedah dan andaian berikut digunakan untuk menganggar nilai saksama setiap kelas instrumen kewangan:

i) **Wang tunai dan dana jangka pendek dan peletakan dengan institusi kewangan**

Amaun dibawa wang tunai dan dana jangka pendek dan peletakan dengan institusi kewangan menghampiri nilai saksama disebabkan tempoh kematangan instrumen ini yang agak pendek.

ii) **Sekuriti**

Nilai saksama sekuriti pelaburan didagang secara awam dianggar berdasarkan harga pasaran sebutan pada tarikh lembaran imbalan. Memandangkan tidak terdapat harga pasaran sebutan bagi sekuriti pelaburan, anggaran munasabah nilai saksama dikira berdasarkan kadar indikatif yang diperoleh daripada pihak ketiga.

iii) **Pinjaman, pendahuluan dan pembiayaan**

Kumpulan dan Bank menganggap amaun dibawa bagi pinjaman, pendahuluan dan pembiayaan kepada pelanggan sebagai penghampiran munasabah untuk nilai saksamanya.

Nilai saksama untuk pinjaman berkadar tetap dengan baki kematangan bagi tempoh kurang daripada satu tahun dan pinjaman berkadar boleh ubah adalah dianggar kepada nilai bawaan terhampir. Bagi pinjaman berkadar tetap dan pembiayaan Islamik dengan baki kematangan melebihi satu tahun, nilai saksama adalah dianggar berdasarkan jangkaan aliran tunai hadapan bagi ansuran kontrak dan didiskaunkan mengikut kadar yang ditawarkan kepada peminjam, baru dengan profil kredit yang serupa yang berkuatkuasa pada tarikh laporan kewangan. Bagi pinjaman tidak berkadar, nilai saksama adalah dianggap kepada nilai saksama terhampir, terdiri daripada peruntukan pembiayaan tertentu untuk hutang rugu dan lapuk.

iv) **Amaun belum terima dan perlu dibayar yang lain**

Amaun dibawa bagi belum terima dan perlu dibayar yang lain adalah anggaran munasabah nilai saksama disebabkan tempoh kematangan mereka yang agak pendek.

v) **Pelaburan lain**

Nilai saksama bagi pelaburan lain adalah berdasarkan bahagian aset ketara bersih syarikat pelaburan pada tarikh lembaran imbalan.

vi) **Deposit-deposit daripada pelanggan dan institusi kewangan**

Kumpulan dan Bank menganggap amaun dibawa untuk keseluruhan depositnya, seperti deposit-deposit pelanggan bukan bank dan deposit serta baki bank, ejen dan syarikat berkaitan, sebagai anggaran munasabah untuk nilai saksama masing-masing memandangkan kebanyakannya perlu dibayar apabila dituntut dan bersifat jangka pendek.

vii) **Pinjaman daripada institusi**

Nilai saksama pinjaman daripada Bank Negara Malaysia adalah dianggarkan pada nilai bawaan.

Deputy Chairman

On behalf of the Board of Directors, I am pleased to present Bank Simpanan Nasional's Annual Report and Financial Statements for the financial year ended 31 December 2009.

## DEPUTY CHAIRMAN'S STATEMENT

### MALAYSIAN ECONOMY

The Malaysian economy registered a growth of 4.5% in the fourth quarter of 2009. Sustainable private consumption and increased public sector spending contributed to a higher domestic demand. The implementation of the fiscal stimulus measures has been a major factor in the economic recovery of the nation.

The public sector is reported to have played a major role in stimulating growth with a 1.3% increase in consumption expenditure and a significant increase in capital expenditure following the implementation of projects under the fiscal stimulus packages.

Malaysia has also reportedly continued to attract foreign investment with increased gross inflows from RM6.7 billion to RM7.2 billion in the third quarter, with a large proportion of investment coming from the Manufacturing and Service sectors. Overall, the service sector has shown higher growth in almost all sub-sectors.

The global economic recovery has reportedly improved in the fourth quarter of 2009 and this positive trend is expected to continue till 2010.

*(Report: Bank Negara Malaysia)*

### FINANCIAL PERFORMANCE

The year 2009 saw BSN's continuing effort to strengthen its competitive edge in terms of financial performance and to further enhance its social role for the welfare of its customers. BSN has recorded an improved financial performance with operating profit before tax of RM467 million, an increase of 100.4% compared to 2008.

The Bank has continued to prosper and to continue building a solid foundation to realising its long-term goal of becoming not only the country's main savings institution, but also a viable financial institution capable of competing with local commercial institutions.

For the financial year 2009, BSN's total revenue increased by 16.1% to RM1,209 million from RM1,041 million in the previous financial year. This significant growth was contributed by the various activities of Investment, Depositors, and Fees. Personal loan was the biggest contributor to the increase in the bank's portfolio asset and subsequently, before-tax profit in 2009. Personal Loans and Housing Loans increased by 19.0% in 2009.

The increase in the number of Personal Loans was a major contributor to the growth of total loans, which increased by RM1,265 million or 27.2% to RM5,908 million at the end of 2009.

## Deputy Chairman's Statement

Loan Portfolio and Bank Financing also showed growth in which it covers 49.2% of total assets. BSN continues to aggressively promote attractive and competitive Islamic Banking products. As a result, financing activity remained strong with Islamic-based financing recording a significant increase of RM1,014 million to RM4,296 million at the end of 2009. These achievements reinforce BSN's confidence in its ability to continue showing positive performance in Islamic Banking as well as contributing to the growth of Islamic financial system in Malaysia.

Meanwhile, the bank continues to regulate its non-performing loans by improving its Risk Management through credit assessment and debt collection. Credit Clinics, introduced by BSN in an effort to help customers facing difficulty with repayment of loans during the economic crisis, were among the factors in helping to regulate non-performing loans. It has succeeded in reducing the rate of Gross Non-Performing Loans from 8.1% in 2008 to 6.0% in 2009, whereas the Net Non-Performing Loans experienced a slight increase from 1.5% in 2008 to 1.8% in 2009.

BSN's total retail depositors increased by RM807 million or 7.8% to RM11,109 million for the year ended 2009 for which the increase was attributed to products such as GIRO at RM101 million or 2.0%, Fixed Deposit (FD) at RM92 million or 6.5%, Premium Savings Certificate (PSC) at RM303 million or 30.6%, Mudharabah at RM198 million or 9.1%, and i-GIRO at RM103 million or 17.0%.

As a Community Bank, the Bank continues to invest its funds by giving importance to the provision of access to banking facilities and financial support to all segments of society, particularly in rural and remote areas.

This initiative saw BSN opening several new branches in Setia Alam in Selangor, Bandar Sri Iskandar and Changkat Jering in Perak, and a social outlet in Song, Sarawak.

The Bank also expanded its Mobile Banking Unit (MBU) services to cover areas such as Kuching and Bekenu (Miri Zone) in Sarawak. The Rationalisation Programme continues on with efforts to upgrade, consolidate, and identify and place selected branches at more strategic locations. This is also an ongoing effort of the Bank to continue to offer convenient banking facilities to its customers and the general public. As of December 2009, BSN has a network of 376 branches, 735 Automated Teller Machines and 81 Cash Deposit Machines throughout the country.

BSN's Micro Finance portfolio has also grown significantly that by year ended 2009, BSN has given out loans totalling RM106 million. This scheme aims to help small entrepreneurs who need working capital and technical skills to allow them to become more viable and competitive in the business world. BSN remains committed towards providing Micro Financing to small entrepreneurs by opening more Micro Finance Centres to facilitate loan application and approval processes. BSN is one of the major financial institutions to offer this facility. In addition to this facility, BSN also provides advisory services to borrowers to ensure that businesses of borrowers remain competitive.

## CORPORATE GOVERNANCE

Integrity, transparency and accountability in all of BSN's business practices and activities are the principles held by BSN's Board of Directors to drive BSN towards a better future. This is the basis for the continuing support it enjoys from all its stakeholders. Four Board Committees established in accordance with the Guidelines on Corporate Governance Standards on Directorship for Development Financial Institutions (GP4), to carry out supervisory tasks.

## Activity Report

Bandar Sri Permaisuri branch in Kuala Lumpur

Bandar Setia Alam branch in Selangor

Changkat Jering branch in Perak

BSN social branch in Song, Sarawak

### Official opening of Setia Alam BSN branch

As part of its commitment to offer convenience and banking access to its customers, BSN opened a branch in Setia Alam, Selangor on 12 March 2009. The event was officiated by the Chairman of BSN, Y.Bhg. Dato' Seri Abdul Azim Mohd. Zabidi.

Bandar Setia Alam is a rapidly growing new township and a commercial business centre, and so the presence of the branch is relevant and consistent with the business development in this area.

### Official opening of Changkat Jering BSN branch

On 6 April 2009, BSN expanded its financial access by opening another branch in Changkat Jering, Perak. The event was officiated by Y.B. Tan Sri Muhyiddin Yassin, Minister of International Trade & Industry. The event was also attended by the Chairman of BSN, Y.Bhg. Dato' Seri Abdul Azim Mohd. Zabidi, as well as the General Manager/Chief Executive of BSN, Y.Bhg. Datuk Adinan Maning. The opening of this branch is both BSN's commitment to improve the delivery of banking services for the convenience of the local community and to realise BSN's objective in providing a channel for saving to the residents in the area.

### Official opening of BSN social branch in Song, Sarawak

BSN expanded its social branch by opening a branch in Song, Sarawak on 23 April 2009. BSN is the only financial institution that provides banking services to the communities in Song, whose population is estimated to be around 10,000 people. Song is located in the interior, near the Rejang River. It lacks proper road facility which makes it difficult for the people to gain access to business and banking facilities. With the operation of the branch, residents in the Kapit area will have access to the bank and need not travel to Kanowit for their banking activities.

## ISLAMIC BANKING

In line with BSN's effort to contribute to the development of Islamic banking as well as to provide access and financing channels and Syariah-based banking facilities to its customers and the public, BSN expanded its Islamic Banking access by opening two Islamic Banking branches in Pengkalan Chepa in Kelantan and Kuala Nerus in Terengganu. The two branches began operations on 1 December 2009. The plan to set up these centres that offer such facilities was a BSN's initiative in its aim to become a player within a more integrated Islamic Banking environment and to remain competitive with other local financial institutions.

*Social Responsibility - BSN's platform to help the less fortunate*

## **HUMAN CAPITAL DEVELOPMENT AND CULTIVATING CULTURE OF EXCELLENCE PROGRAMME**

Employees possessing virtues such as excellence, highly-skilled and integrity are important assets to an organisation. In an effort to realise these aspirations, BSN has undertaken several initiatives to incorporate these cultures in their daily work.

Among the initiatives undertaken are as follows:

- **Human Capital Development**

To realise the aspiration of developing skilled personnel with high integrity, BSN has invested in a number of related programmes. The nurturing of moral values starts when an employee joins BSN, through an Induction Programme at BSN's Learning Centre in Bangi.

In addition, work-related programmes are also being carried out intensively to ensure that BSN personnel will be able to compete in providing the best service to every customer.

Courses on management skills (soft skills) are also being carried out to improve the efficiency of personnel management.

The Chief Executive Quality Award is held annually to give recognition to staff who demonstrated excellence and proactive attitude in driving BSN towards higher achievements. The award will also spur the other staff to work even harder and filled with motivation to obtain the same recognition.

**BSN's Assets - Highly skilled employees with integrity**

In addition, a more systematic Succession Planning has been introduced as a strategic approach to ensure continuity of leadership in implementing the Business Strategic Plan that has been drawn up.

- **Establishment of Performance Management System**

This encompasses the Final Performance Management Process Flow, which aims to produce a more effective, uniform and transparent Achievement Report. This report will help staff to continually improve the quality of their services as well as identify employees in need of guidance and counselling.

- **Re-evaluation of BSN Salary Structure**

BSN's Salary Structure was reviewed to ensure that the remuneration packages enjoyed by the staff were in line with other development banking institutions' practices.

In addition, the new remuneration structure provides opportunities for the staff to further their careers.

This is as an effort to ensure that BSN staff remains highly motivated in their commitment towards work.

- **Job Evaluation**

A Job Evaluation study was undertaken to restructure human capital where a balance between grade and responsibilities of staff is taken into account.

This initiative has an impact on BSN's overall Strategic Planning where the executive to non-executive staff ratio has increased satisfactorily.

Interest rate risk refers to volatility in net interest income as a result of changes in the levels of interest rate and shifts in the composition of the assets and liabilities. Interest rate risk is managed through interest rate sensitivity gap analysis. The objective of interest rate risk management is to ensure the Group maximises returns through strategic decisions made with acceptable interest rate risk exposure.

### (b) Credit risk

Credit risk is the potential loss of revenue and principal losses in the form of specific allowances as a result of partial or total default of a loan by the borrower. The Group manages its credit risk through proper credit evaluation, collateral and repayment analysis and segregation of approving authority. The objective of credit risk management is to ensure that credit activities are conducted in a proper manner so as to minimise the risk exposure.

### (c) Liquidity risk

Liquidity risk relates to the activity of maintaining sufficient liquid assets to meet its financial commitments and obligations when they fall due in a cost effective manner.

It is the Group's policy to maintain sufficient liquidity to fund daily operations and to meet its obligations to depositors and borrowers. Liquidity risk is controlled through the liquidity gap analysis.

Market risk is the risk related to the fluctuation in the value of fixed income and equity investment as a result of changes in the market prices. In the case of fixed income investment, such changes are due to a change in interest rates or rating. ## **2. BASIS OF PREPARATION OF THE FINANCIAL STATEMENTS (Continued)**

### **(b) Basis of measurement**

The financial statements have been prepared on the historical cost basis except for the following assets and liabilities as explained in their respective accounting policy notes:

- Securities held-for-trading
- Securities available-for-sale

### **(c) Functional and presentation currency**

These financial statements are presented in Ringgit Malaysia (RM), which is the Bank's functional currency. All financial information presented in RM has been rounded to the nearest thousand, unless otherwise stated.

### **(d) Use of estimates and judgements**

The preparation of financial statements requires the management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised and in any future periods affected.

In particular, information about significant areas of estimation, uncertainty and critical judgements in applying accounting policies that have the most significant effect on the amount recognised in the financial statements are described in the following notes:

- Note 3 (f)-allowance for bad and doubtful debts

## **3. SIGNIFICANT ACCOUNTING POLICIES**

The accounting policies set out below have been applied consistently to all periods presented in these financial statements, and have been applied consistently by Group entities, unless otherwise stated.

### **(a) Basis of consolidation**

#### **(i) Subsidiaries**

Subsidiaries are entities, including unincorporated entities, controlled by the Group. Control exists when the Group has the ability to exercise its power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. In assessing control, potential voting rights that presently are exercisable are taken into account.

The financial statements of subsidiaries are included in the consolidated financial statements from the date that control commences until the date that control ceases.

Investments in subsidiaries are stated in the Bank's balance sheet at cost less impairment losses, unless the investment is classified as held for sale (or included in a disposal group that is classified as held for sale).

Minority interests at the balance sheet date, being the portion of the net assets of subsidiaries attributable to equity interests that are not owned by the Bank, whether directly or indirectly through subsidiaries, are presented in the consolidated balance sheet and statement of changes in equity within equity, separately from equity attributable to the equity shareholders of the Bank.

# NOTES TO THE FINANCIAL STATEMENTS

31 DECEMBER 2009

## 3. SIGNIFICANT ACCOUNTING POLICIES (Continued)

### (a) Basis of consolidation (Continued)

#### (i) Subsidiaries (Continued)

Minority interests in the results of the Group are presented on the face of the consolidated income statements as an allocation of the total profit or loss for the year between minority interests and the equity shareholders of the Bank.

Where losses applicable to the minority exceed the minority's interest in the equity of a subsidiary, the excess, and any further losses applicable to the minority, are charged against the Group's interest except to the extent that the minority has a binding obligation to, and is able to, make additional investment to cover the losses.

If the subsidiary subsequently reports profits, the Group's interest is allocated all such profits until the minority's share of losses previously absorbed by the Group has been recovered.

#### (ii) Associates

Associates are entities, including unincorporated entities, in which the Group has significant influence, but not control, over the financial and operating policies.

Associates are accounted for in the consolidated financial statements using the equity method unless it is classified as held for sale (or included in a disposal group that is classified as held for sale). The consolidated financial statements include the Group's share of the income and expenses of the equity accounted associates, after adjustments to align the accounting policies with those of the Group, from the date that significant influence commences until the date that significant influence ceases.

When the Group's share of losses exceeds its interest in an equity accounted associate, the carrying amount of that interest (including any long-term investments) is reduced to nil and the recognition of further losses is discontinued except to the extent that the Group has an obligation or has made payments on behalf of the investee.

Investments in associates are stated in the Bank's balance sheet at cost less impairment losses, unless the investment is classified as held for sale (or included in a disposal group that is classified as held for sale).

#### (iii) Transactions eliminated on consolidation

Intra-group balances, and any unrealised income and expenses arising from intra-group transactions, are eliminated in preparing the consolidated financial statements.

Unrealised gains arising from transactions with equity accounted investees are eliminated against the investment to the extent of the Group's interest in the investee. Unrealised losses are eliminated in the same way as unrealised gains, but only to the extent that there is no evidence of impairment.

### **3. SIGNIFICANT ACCOUNTING POLICIES (Continued)**

#### **(b) Foreign currency transactions**

Transactions in foreign currencies are translated to the respective functional currencies of Group entities at the exchange rates at the dates of the transaction.

Monetary assets and liabilities denominated in foreign currencies at the balance sheet date are retranslated to the functional currency at the exchange rate at that date. Non-monetary assets and liabilities denominated in foreign currencies that are measured at fair value are retranslated to the functional currency at the exchange rate at the date that the fair value was determined. Foreign currency differences arising on retranslation are recognised in the income statements.

#### **(c) Cash and cash equivalents**

Cash and cash equivalents include cash and bank balances at banks and other financial institutions and short term funds.

#### **(d) Securities**

Investments in securities of the Group and the Bank are classified according to the following categories depending on the purpose for which the securities were acquired.

##### **(i) Securities held-for-trading**

Securities are classified as held-for-trading if these financial assets are acquired principally for the purpose of benefiting from actual or expected short-term price movement or to lock in arbitrage profits. Securities held-for-trading are stated at fair value and any gain or loss arising from a change in their fair values and the derecognition of securities held-for-trading are recognised in the income statements.

##### **(ii) Securities held-to-maturity**

Securities held-to-maturity are financial assets with fixed or determinable payments and fixed maturity that the Group and the Bank have the positive intent and ability to hold to maturity. Unquoted shares in organisations set up for socio-economic purposes and equity instruments received as a result of loan restructuring or loan conversion which do not have a quoted market price in an active market and whose fair value cannot be reliably measured are also classified as securities held-to-maturity.

The securities held-to-maturity are measured at accreted/amortised cost based on the effective yield method. Amortisation of premium, accretion of discount and impairment as well as gain or loss arising from derecognition of securities held-to-maturity are recognised in the income statements.

Any sale or reclassification of a significant amount of securities held-to-maturity not close to their maturity would result in the reclassification of all securities held-to-maturity to securities available-for-sale, and prevent the Group and the Bank from classifying the similar class of securities as securities held-to-maturity for the current and following two financial years.

##### **(iii) Securities available-for-sale**

Securities available-for-sale are financial assets that are not classified as held-for-trading or held-to-maturity. The securities available-for-sale are measured at fair value or at cost (less impairment losses) if the fair value cannot be reliably measured. Any gain or loss arising from change in fair value are recognised directly in equity through the statement of changes in equity, until the financial asset is sold, collected, disposed of or impaired, at which time the cumulative gain or loss previously recognised in equity will be transferred to the income statements.

# NOTES TO THE FINANCIAL STATEMENTS

31 DECEMBER 2009

## 3. SIGNIFICANT ACCOUNTING POLICIES (Continued)

### (e) Loans, advances and financing

Loans, advances and financing are stated at cost less any allowance for bad and doubtful debts and financing.

### (f) Allowance for bad and doubtful debts

Specific allowances are made for non-performing loans and financing which have been individually reviewed and specifically identified as substandard, doubtful or bad.

A general allowance based on a percentage of the loans and financing portfolio is also made to cover possible losses which are not specifically identified.

An uncollectible loan and financing or portion of a loan and financing classified as bad is written off after taking into consideration the realisable value of collateral, if any, when in the judgement of the management, there is no prospect of recovery.

### (g) Receivables

Receivables are initially recognised at their cost when the contractual right to receive cash or another financial asset from another entity is established.

Subsequent to initial recognition, receivables are stated at cost less allowance for doubtful debts.

Receivables are not held for the purpose of trading.

Known bad debts for takaful business are written off and specific allowances are made for any outstanding premiums or reinsurance balances, which remain outstanding for more than 6 months from the date on which they become receivable, and for all debts which are considered doubtful.

### (h) Property, plant and equipment

#### (i) Recognition and measurement

Items of property, plant and equipment are stated at cost less accumulated depreciation and impairment losses.

Cost includes expenditures that are directly attributable to the acquisition of the asset. The cost of self-constructed assets includes the cost of materials and direct labour, any other costs directly attributable to bringing the asset to working condition for its intended use, and the costs of dismantling and removing the items and restoring the site on which they are located. Purchased software that is integral to the functionality of the related equipment is capitalised as part of that equipment.

The cost of property, plant and equipment recognised as a result of a business combination is based on fair value at acquisition date. The fair value of property is the estimated amount for which a property could be exchanged on the date of valuation between a willing buyer and a willing seller in an arm's length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion. The fair value of other items of plant and equipment is based on the quoted market prices for similar items.

### **3. SIGNIFICANT ACCOUNTING POLICIES (Continued)**

#### **(h) Property, plant and equipment (Continued)**

##### **(i) Recognition and measurement (Continued)**

At the end of the financial year, when the property, plant and equipment been fully depreciated in accordance with the useful live and yet bringing the economic benefits, the property, plant and equipment is valued at fair value.

When significant parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

##### **(ii) Reclassification to investment property**

When the use of a property changes from owner-occupied to investment property, the property is measured at cost and reclassified as investment property.

##### **(iii) Subsequent costs**

The cost of replacing part of an item of property, plant and equipment is recognised in the carrying amount of the item if it is probable that the future economic benefits embodied within the part will flow to the Group and its cost can be measured reliably. The costs of the day-to-day servicing of property, plant and equipment are recognised in the income statements as incurred.

##### **(iv) Depreciation**

Depreciation is recognised in the income statements on a straight-line basis over the estimated useful lives of each part of an item of property, plant and equipment. Leased assets are depreciated over the shorter of the lease term and their useful lives. Freehold land is not depreciated. Property, plant and equipment under construction are not depreciated until the assets are ready for their intended use.

The estimated useful lives for the current and comparative periods are as follows:

• buildings	50 years
• plant and equipment	5 – 7 years
• fixtures and fittings	5 – 7 years
• major components	25 – 30 years
• renovations	7 years

The depreciable amount is determined after deducting the residual value.

Depreciation methods, useful lives and residual values are reassessed at the reporting date.

##### **(i) Impairment of assets**

The carrying amount of the Group's assets except for deferred tax assets, financial assets (other than securities held-to-maturity and available-for-sale) and investment properties are reviewed at each balance sheet date to determine whether there are any indications of impairment. If any such indications exist, the asset's recoverable amount is estimated and an impairment loss is recognised in the income statements.

# NOTES TO THE FINANCIAL STATEMENTS

31 DECEMBER 2009

## 3. SIGNIFICANT ACCOUNTING POLICIES (Continued)

### (i) Impairment of assets (Continued)

The policies on impairment of assets are summarised as follows:

#### (i) Securities held-to-maturity

For securities carried at amortised cost in which there are objective evidence of impairment, impairment loss is measured as the difference between the securities' carrying amount and the present value of the estimated future cash flows discounted at the securities' original effective interest rate. The amount of the impairment loss is recognised in the income statements.

Subsequent reversals in the impairment loss is recognised when the decrease can be objectively related to an event occurring after the impairment was recognised, to the extent that the securities' carrying amount does not exceed its amortised cost if no impairment had been recognised. The reversal is recognised in the income statements.

For securities carried at cost, impairment loss is measured as the difference between the securities' carrying amount and the present value of estimated future cash flows discounted at the current market rate of return for similar securities. The amount of impairment loss is recognised in the income statements and such impairment losses are not reversed subsequent to its recognition.

#### (ii) Securities available-for-sale

For securities available-for-sale in which there are objective evidence of impairment, the cumulative impairment loss that had been recognised directly in equity shall be transferred from equity to the income statements, even though the securities have not been derecognised. The cumulative impairment loss is measured as the difference between the acquisition cost (net of any principal repayment and amortisation) and the current fair value, less any impairment loss previously recognised in the income statements.

Impairment losses on investments in equity instruments classified as available-for-sale are not reversed subsequent to its recognition. Reversals of impairment losses on debt instruments classified as available-for-sale are recognised in the income statements if the increase in the fair value can be objectively related to an event occurring after the recognition of the impairment loss in the income statements.

#### (iii) Goodwill

Goodwill that has an indefinite useful life is tested annually for impairment, or more frequently if events or changes in circumstances indicate that it might be impaired. For impairment testing, goodwill from business combinations is allocated to cash-generating units ("CGU") which are expected to benefit from the synergies of the business combination.

The recoverable amount is determined for each CGU based on its value in use. In assessing value in use, the estimated future cash flows discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

### **3. SIGNIFICANT ACCOUNTING POLICIES (Continued)**

#### **(i) Impairment of assets (Continued)**

##### **(iii) Goodwill (continued)**

An impairment loss is recognised in the income statements when the carrying amount of the CGU, including the goodwill, exceeds the recoverable amount of the CGU. The total impairment loss is allocated, first, to reduce the carrying amount of goodwill allocated to the CGU and then to the other assets of the CGU on a pro-rata basis.

##### **(iv) Other assets**

Other assets such as property and equipment, investments in subsidiary companies and associated companies are reviewed for objective indications of impairment at each balance sheet date or whenever there is any indication that these assets may be impaired. Where such indications exist, impairment loss is determined as the excess of the asset's carrying value over its recoverable amount (greater of value in use or fair value less costs to sell) and is recognised in the income statements. Any reversal of an impairment loss for these assets is recognised in the income statements. The carrying amount is increased to its revised recoverable amount, provided that the amount does not exceed the carrying amount that would have been determined (net of amortisation or depreciation) had no impairment loss been recognised for the asset in prior years.

#### **(j) Investment property**

Investment properties are properties which are owned or held under a leasehold interest to earn rental income or for capital appreciation or for both. These include land held for a currently undetermined future use. Properties that are occupied by the companies in the Group are accounted for as owner-occupied rather than as investment properties.

Investment properties are stated at cost less accumulated depreciation and impairment losses, consistent with the accounting policy for property, plant and equipment as stated in the accounting policy notes.

Depreciation is charged to the income statements on a straight-line basis over the estimated useful lives of 25 to 50 years.

#### **(k) Leasehold land/Prepaid lease payments**

Leasehold land that normally has an indefinite economic life and title and is not expected to pass to the lessee by the end of the lease term is treated as an operating lease. The payment made on entering into or acquiring a leasehold land is accounted for as prepaid lease payments that are amortised over the lease term in accordance with the pattern of benefits provided except for leasehold land classified as investment property.

# NOTES TO THE FINANCIAL STATEMENTS

31 DECEMBER 2009

## 3. SIGNIFICANT ACCOUNTING POLICIES (Continued)

### (l) Goodwill

Goodwill/(negative goodwill) arises on the acquisition of subsidiaries, associates and joint ventures.

Goodwill is measured at cost and is no longer amortised but tested for impairment at least annually or more frequently when there is objective evidence of impairment. When the excess is negative (negative goodwill), it is recognised immediately in the income statements.

Goodwill is allocated to cash-generating units and is tested annually for impairment or more frequently if events or changes in circumstances indicate that it might be impaired.

In respect of equity accounted investees, the carrying amount of goodwill is included in the carrying amount of the investment. The entire carrying amount of the investment is tested for impairment when there is objective evidence of impairment.

### (m) Deposits from customers

Deposits from customers are stated at placement values and adjusted for accrued interest.

### (n) Borrowing from Institution

Borrowings from institutions are stated at cost.

### (o) Provisions

A provision is recognised if, as a result of a past event, the Group has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

Where an account is classified as non-performing, interest is suspended and clawed back to day one until it is realised on a cash basis. Customers' accounts are classified as non-performing where repayments are in arrears for six months or more from the first day of default for loan and advances, except for credit card accounts, which are classified as non-performing where payments are in arrears for more than three months.

The policy on suspension of interest is in accordance with the directives issued by Bank Negara Malaysia on "Guidelines on the Suspension of Interest on Non-Performing Loans and Provision for Bad and Doubtful Debts, BNM/GP3".

#### ***Contingent liabilities***

Where it is not probable that an outflow of economic benefits will be required, or the amount cannot be estimated reliably, the obligation is disclosed as a contingent liability, unless the probability of outflow of economic benefits is remote. Possible obligations, whose existence will only be confirmed by the occurrence or non-occurrence of one or more future events are also disclosed as contingent liabilities unless the probability of outflow of economic benefits is remote.

Where the Bank enters into financial guarantee contracts to guarantee the indebtedness of others within its group, the Bank considers these to be insurance arrangements, and accounts for them as such. In this respect, the Bank treats the guarantee contract as a contingent liability until such time as it becomes probable that the Bank will be required to make a payment under the guarantee.

### **3. SIGNIFICANT ACCOUNTING POLICIES (Continued)**

#### **(o) Provisions (Continued)**

##### ***Provision for wakalah fee reserves***

In the current year a provision is made to record certain future expected losses to the shareholders' fund arising from servicing of individual policy contracts with participants.

The provision is estimated based on discounted future net cash flows to the shareholders' fund using an actuarial method consistent with that used for non unit reversing in a conventional life insurer called sterling reserves methodology.

The assumptions used are consistent with that used in the valuation of tabarru' fund and the shareholders' fund expense assumptions are based on an affiliated subsidiary practice.

#### **(p) Payables**

Payables are measured initially and subsequently at cost. Payables are recognised when there is a contractual obligation to deliver cash or another financial asset to another entity.

#### **(q) Revenue recognition**

Income from the various activities of the Group and of the Bank is accrued using the following bases:

##### **(i) Interest income**

- (a) Interest income on hire purchase is recognised on the "sum-of-digits" method.
- (b) Interest income on housing and term loans are recognised by reference to rest periods which are monthly, quarterly or yearly.
- (c) Interest income from private debt securities are recognised on an accrual basis.

##### **(ii) Investment income**

- (a) Accretion of discounts and amortisation of premiums on investment securities are recognised on time proportion basis to maturity dates that takes into account the effective yield on investment securities.

##### **(iii) Dividend income**

- (a) Dividend income is recognised when the right to receive payment is established.

##### **(iv) Fee income**

- (a) Fees on a variety of services and facilities extended to customers are recognised on inception of such transactions.

##### **(v) Islamic placement and financing income**

- (a) Income derived from Bai-Bithamil Ajil financing is recognised on an accrual basis.
- (b) Income from placements with financial institutions under the Syariah principles is recognised on an accrual basis.

## 3. SIGNIFICANT ACCOUNTING POLICIES (Continued)

### (q) Revenue recognition (Continued)

#### (vi) Commissions

When the Group acts in the capacity of an agent rather than as the principal in a transaction, the revenue recognised is the net amount of commission made by the Group.

#### (vii) Government development grant

Government grant is recognised initially as deferred income when there is reasonable assurance that it will be received and that the Group will comply with the conditions associated with the grant. Grants that compensate the Group for expenses incurred are recognised in the income statements on a systematic basis in the same periods in which the expenses are recognised. Grants that compensate the Group for the cost of an asset are recognised in the income statements on a systematic basis over the useful life of the asset.

#### (viii) Other revenue recognition

Other interest for Takaful business is recognised on the time proportion basis that takes into account the effective yield of the asset.

### (r) Profit equalisation reserve (“PER”) for the Islamic Banking Scheme

Profit equalisation reserve is the amount provided in order to maintain a certain level of return for depositors in conformity with Bank Negara Malaysia’s Guidelines - “The Framework of the Rate of Return”. The PER is deducted at a maximum amount of 15% of the total gross income and is maintained to 30% or above of total Islamic banking capital funds.

### (s) Interest, financing and related expense recognition

Interest expense and attributable profit (on activities relating to SPI business) on deposits and borrowings of the Group and Bank are expensed as incurred and is recognised on an accrual basis.

### (t) Employee benefits

#### (i) Short term benefits

Short-term employee benefit obligations in respect of salaries, annual bonuses, paid annual leave and sick leave are measured on an undiscounted basis and are expensed as the related service is provided.

A provision is recognised for the amount expected to be paid under short-term cash bonus or profit-sharing plans if the Group has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

The Group’s contribution to the Employee’s Provident Fund are charged to the income statements in the year to which they relate. Once the contributions have been paid, the Group has no further payment obligations.

### **3. SIGNIFICANT ACCOUNTING POLICIES (Continued)**

#### **(u) Tax expense**

Tax expense comprises current and deferred tax. Tax expense is recognised in the income statements except to the extent that it relates to items recognised directly in equity, in which case it is recognised in equity.

Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantially enacted at the balance sheet date, and any adjustment to tax payable in respect of previous years.

Deferred tax is recognised using the balance sheet method, providing for temporary differences between the carrying amounts of assets and liabilities for reporting purposes and the amounts used for taxation purposes. Deferred tax is not recognised for the following temporary differences: the initial recognition of goodwill, the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit (tax loss). Deferred tax is measured at the tax rates that are expected to be applied to the temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the balance sheet date.

Deferred tax liability is recognised for all taxable temporary differences.

A deferred tax asset is recognised to the extent that it is probable that future taxable profits will be available against which temporary difference can be utilised. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

Additional taxes that arise from the distribution of dividends are recognised at the same time as the liability to pay the related dividend is recognised.

#### **(v) General takaful underwriting results**

The general takaful underwriting results are determined for each class of business after taking into account retakaful, commissions, unearned contributions and claims incurred.

##### **(i) Unearned contributions reserves**

The unearned contribution reserves ("UCR") represent the portion of the net contributions of takaful policies written that relate to the unexpired periods of the certificates at the end of the financial period.

The 1/365 method is used for all general takaful business of the Company.

##### **(ii) Provision for claims**

A liability for outstanding claims is recognised in respect of direct insurance. The amount of outstanding claims is the best estimate of the expenditure required together with related expenses less recoveries to settle the present obligation at the balance sheet date.

Provision is also made for the cost of claims, together with related expenses incurred but not reported at balance sheet date, using a mathematical method of estimation.

##### **(iii) Acquisition costs**

The cost of acquiring and renewing insurance policies net of income derived from ceding reinsurance premiums is recognised as incurred and properly allocated to the periods in which it is probable they give rise to income.

# NOTES TO THE FINANCIAL STATEMENTS

## 3. SIGNIFICANT ACCOUNTING POLICIES (Continued)

### (w) Family takaful underwriting results

The surplus transferable from the Life fund to the income statements is based on the surplus determined by an annual actuarial valuation of the long term liabilities to policy holders.

#### (i) Contribution income

Contribution is recognised as soon as the amount of the contribution can be reliably measured.

##### **Unit-linked business**

First contribution income is recognised on the assumption of risk and subsequent contributions are recognised on a cash basis. Subsequent risk is assumed based on sufficiency of units of the certificate holder.

#### (ii) Commission and agency expenses

Commission and agency expenses, which are costs directly incurred in securing contribution on takaful certificates, net of income derived from retakaful in the course of ceding of contribution to retakaful, are charged to the revenue account in the period in which they are incurred.

#### (iii) Provision for claims

Claims and settlement costs that are incurred during the financial period are recognised when a claimable event occurs and/or the insurer is notified.

Claims and provisions for claims arising on family takaful certificates, including settlement costs, are accounted for using the case basis method and for this purpose, the benefits payable under a family takaful certificates are recognised as follows:

- (a) Maturity or other takaful benefit payments due on specified dates are treated as claims payable on the due dates.
- (b) Death, surrender and other benefits without due dates are treated as claims payable on the date of receipt of termination of death of the assured or occurrence of contingency covered.

### 3. SIGNIFICANT ACCOUNTING POLICIES (Continued)

#### (w) Family takaful underwriting results (Continued)

##### (iv) Actuary reserve

The actuarial liability for the Mortgage Reducing Term Takaful ("MRTT") products managed under group family fund is calculated using the net contribution method of valuation ("NCV"). The liability is ascertained by deducting the present value of future net contribution from the present value of the future amount-at-risk.

The actuarial liability for the investment-linked products managed under individual family fund is calculated using the discounted cash flow method to ensure that any future negative cash flow resulting from insufficiency of tabarru charges to meet expected benefit outgo are eliminated.

As with all projections, there are elements of uncertainty and thus the projected liabilities may be different from its actual liabilities due to the significant level of uncertainty involved in the discount rate used as well as mortality and morbidity assumptions.

#### (x) Wakalah fees, commission expenses and management expenses

In accordance with the principles of Wakalah, as approved by the Shariah Committee and agreed between the participants and the subsidiary, an agreed percentage of the gross contribution will be charged by the shareholders' fund on an upfront basis to the general takaful and family takaful funds as wakalah fees.

The wakalah fees charged by the shareholders' fund from the participants are used to pay all management expenses and commission expenses in the shareholders' fund, which were incurred on behalf of the general takaful and family takaful funds. All management expenses are recognised in the shareholders' fund as incurred.

Commission expenses, which are costs directly incurred in securing contributions on takaful certificates are recognised in the shareholders' fund as incurred and properly allocated to the periods in which it is probable they give rise to income.

## **39. FINANCIAL INSTRUMENTS AND RELATED DISCLOSURE (Continued)**

The following methods and assumptions are used to estimate the fair value of each class of financial instruments:

**i) Cash and short term funds and placements with financial institutions**

The carrying amount of cash and short term funds and placements with financial institutions approximates fair value due to the relatively short term maturity of these instruments.

**ii) Securities**

The fair value of publicly traded investment securities are estimated based on quoted market prices at the balance sheet date. As there are no quoted market prices for investment securities, a reasonable estimate of fair value has been calculated based on the indicative rates obtained from third party.

**iii) Loans, advances and financing**

The Group and the Bank consider the carrying amount of loans, advances and financing to customers as a reasonable approximation of its fair value.

The fair values of fixed rate loans with remaining maturity of less than one year and variable rate loans are estimated to approximate their carrying values. For fixed rate loans and Islamic financing with remaining maturity of more than one year, the fair values are estimated based on expected future cash flows of contractual installment and discounted at applicable prevailing rates as at balance sheet date offered to new borrowers with similar credit profiles. In respect of non-performing loans, their fair values are deemed to approximate the carrying values, net of specific allowance for bad and doubtful debts and financing.

**iv) Other receivables and payables**

The carrying amounts of other receivables and payables are reasonable estimates of fair value due to their relatively short term maturity.

**v) Other investments**

Fair value of other investments is based on the share of net tangible assets of the investee companies as at the balance sheet date.

**vi) Deposits from customers and from financial institutions**

The Group and the Bank consider the carrying amounts of all its deposits, such as non-bank customers' deposits and deposits and balances of banks, agents and related companies, as reasonable approximation of their respective fair value given that these are mostly payable on demand and are short-term in nature.

**vii) Borrowing from institution**

The fair value of borrowing from Bank Negara Malaysia is estimated at the carrying value.
