BSN DANA DIVIDEN AL-IFRAH

2. FUND PERFORMANCE

2.1 Achievement of BSN Dana Dividen Al-Ifrac

For the six-month period ended 30 June 2023, BSN Dana Dividen Al-Ifrac ("the Fund") registered a return of -3.29% as compared to its Benchmark return of -4.79%, thus outperformed the Benchmark's return by 1.50 percentage points.

For the six-month period, the Fund did not declare any dividend distribution. Despite outperforming its Benchmark, due to challenging market condition in the first half of 2023, the Fund did not meet its investment objectives of providing investors with capital appreciation and income opportunities during the period under review.

2.2 Asset Allocations

Asset allocations for BSN Dana Dividen Al-Ifrac are as follows:

Components of Asset Portfolio	%		
	30.06.2023	31.12.2022	31.12.2021
Quoted Shariah-compliant equity investments	68.81	75.55	68.42

Selling Price per Unit (Low) (RM)	0.1699	0.1694	0.1740
Buying Price per Unit (Low) (RM)	0.1699	0.1694	0.1740
Total Fund Return (%)	(3.29)	(1.78)	(2.55)
Capital Growth (%)	(3.29)	(1.78)	(2.55)
Income Return (%)	-	-	-
Performance Fee (RM)	-	-	-
Gross Distribution per Unit (Sen)	-	-	-
Net Distribution per Unit (Sen)	-	-	-
Date of payment	-	-	-
Total Expenses Ratio (%) :	1.41	2.20	2.00
Portfolio Turnover Ratio (times) :	1.58	0.54	0.66

2.4.1 Total Expenses Ratio

The Total Expenses Ratio for the financial period is lower than previous financial year mainly due to lower expenses incurred during the financial period. No performance fees incurred and included in total expenses ratio during the financial period under review.

2.4.2 Portfolio Turnover Ratio

The Portfolio Turnover Ratio for the financial period is higher than previous financial year mainly due to increase in trading activities during the financial period under review.

2.4.3 Distribution of Income

There was no distribution was make out of the fund's capital, no breakdown of distribution sourced from income and capital, neither in value nor percentage of total distribution amount during the financial period under review.

BSN DANA DIVIDEN AL-IFRAH

BASES OF CALCULATION

i. Portfolio Composition

Portfolio composition is calculated according to the market price on 30 June 2023.

ii. Net Asset Value (NAV)

NAV is the value of all the assets of the Fund less the value of all the liabilities at the valuation point divided by the number of units in circulation.

iii. Selling Price per Unit

The price payable by the applicant for a Unit pursuant to a successful application. The Selling price per Unit is the NAV per Unit as at the valuation point and does not include any sales charge which may be imposed.

iv. Buying Price per Unit

The price payable to a unit holder pursuant to a successful application. Buying price per Unit is the NAV per Unit as at the valuation point and does not include any redemption charge which may be imposed.

v. Capital Growth

Capital growth is the difference of the purchase price from year to year.

vi. Distribution of Income

The distribution of income is calculated on the gross dividend divided by the selling price per unit on the first day of the financial year.

$$\frac{\text{Gross Dividend}}{\text{Sale Price on The First Day of the same year}} \times 100$$

vii. Total Expenses Ratio

This ratio is calculated based on the ratio of the sum of fees and the recovered expenses of the unit trust fund to the average value of the unit trust fund calculated on a daily basis.

$$\frac{\text{Fees of the unit trust fund + Recovered expenses of the unit trust fund}}{\text{Average value of the unit trust fund calculated on a daily basis}} \times 100$$

viii. Portfolio Turnover Ratio

The calculation is as follows:

$$\frac{(\text{Total acquisitions of the fund for the year} + \text{Total disposals of the fund for the year}) / 2}{\text{Average value of the unit trust fund for the year calculated on a daily basis}}$$

Note: Past performance of the Fund is not an indication of its future performance.

Unit prices and investment returns may go down, as well as up.

3. MANAGER'S REPORT

3.1 Fund and Benchmark Performance

Over the 5-year period, the Fund recorded a return of -7.91%, outperforming the benchmark return of -13.87% by 5.96 percentage points.

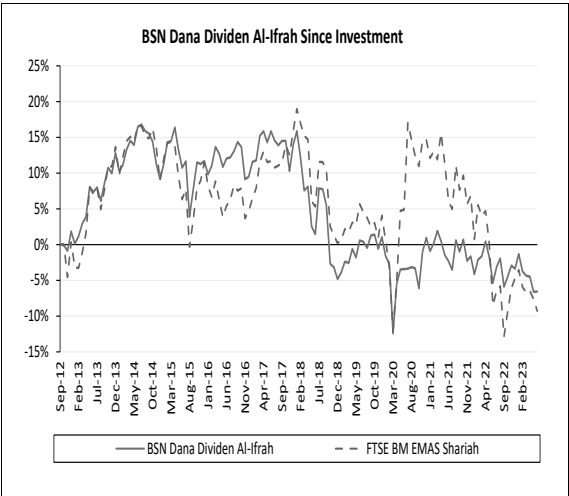

For the six-month period under review, the Fund registered a return of -3.29% as compared to its Benchmark return of -4.79%, thus outperformed the Benchmark's return by 1.50 percentage points.

The selected performance benchmark for the Fund is FBM Emas Shariah Index.

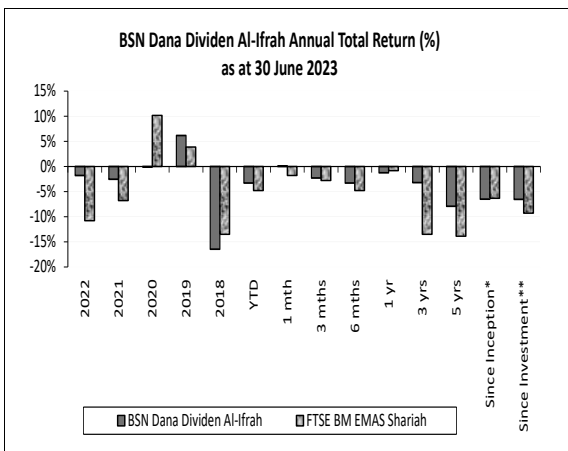

Our strategy is to remain focus on companies that are consistently paying attractive dividend yields and have potential earnings growth over the medium- to long-term.

As at 30 June 2023, the Fund has 74.08% exposure to Shariah-compliant equities and 25.92% exposure to cash. The total NAV of the Fund is RM43.448 million whereas the NAV per unit is RM0.1707.

The Fund did not declare any distribution of income for the period under review.

Unit prices and investment returns may go down, as well as up.

3.2 Investment Policies

The investment policies for BSN Dana Dividen Al Ifrah are to invest in permitted investment, especially into Shariah-compliant shares which are listed on Bursa Malaysia and also into other type of Shariah-compliant instruments, in line with Securities Commission's Guidelines on Unit Trust Funds.

3.3 Economic and Market Review

3.3.1 Economic Review

The economy expanded 5.6% year-on-year in 1Q2023, higher than market forecasts of 4.8% but slowing from a 7.1% growth in Q4, driven mainly by domestic demand. It was the sixth straight quarter of expansion but the softest pace since Q1 2022, amid easing private consumption (5.9% vs 7.3% in Q4), and fixed investment (4.9% vs 8.8%). In addition, government spending dropped (-2.2% vs 3.0%) due to lower spending on supplies and services. Net trade contributed negatively to the GDP as exports shrank by 3.3% and imports fell by 6.5%. On the production side, activity eased for all sectors. The 2023 GDP is projected to expand by 4.0% to 5.0%, driven by firm domestic demand.

Bank Negara Malaysia unexpectedly raised its key overnight policy rate (OPR) by 25bps to 3% in May, marking the first increase since November 2022. While the markets were hoping for steady rates, policymakers emphasized the resilience of domestic growth prospects and deemed it necessary to normalize the degree of monetary accommodation further and withdraw the monetary stimulus aimed at addressing the Covid-19 crisis. Both headline and core inflation are projected to moderate to an average of 2.8-3.8% this year, while GDP growth is anticipated to be driven by domestic demand.

The inflation rate eased to 2.8% in May 2023 from 3.3% in the previous month and lower than market forecasts of 3.0%. It marked the lowest reading since May 2022, due mainly to the further slowdown in transport prices (1.0% vs 2.3% in April) and food & non-alcoholic beverages (5.9% vs 6.3%). Also, inflation lowered for furnishings, household equipment & maintenance (2.7% vs 3%), health (1.9% vs 2.1%) and clothing & footwear (0.4% vs 0.5%), while costs continued to decline for communication (-3.7% vs -1.4%). The core consumer prices, which exclude volatile items of fresh food and administered prices, increased 3.5% year-on-year, the softest rise in ten months. On a monthly basis, the CPI grew 0.2%, slightly up from a 0.1% rise in April.

3.3.2 Market Review

Global equity markets gained in 2Q2023 with the advance led by developed markets, notably the US, while the emerging markets lagged. The big growth stocks which fell sharply last year bounced back strongly, returning 27% YTD and 11% over the quarter, while value stocks lagged, up only 5% YTD.

The US equities ended the quarter higher with the bulk of gains made in June. The market arguably defied expectations in 1H2023 with the S&P 500 notching double-digit returns even as inflation remained elevated, and the Fed continued its fastest rate-hiking campaign since the 1980s. It was one of the best performing markets as it gained 8% QoQ and 16% for the YTD. These gains were driven almost entirely by the largest growth stocks (technology stocks) which are disproportionately found in the US, with the rest of the market delivering much more muted returns so far this year. The country's inflation fell sharply from a peak of 9% down to 4% largely due to favourable base effects from oil prices, which peaked last June and have come down significantly since.

The European market maintained a healthy 14% gain despite the European Central Bank (ECB) raising its rates to 3.5% and signal that they still have further to go. The advance was led by the financial and IT sectors. The ECB raised interest rates twice in the quarter, taking the main refinancing rate to 4.0%. Headline inflation declined during the period, however the core inflation rate crept up to 5.4% in June from 5.3% in May. Forward-looking data pointed to slowing momentum in the Eurozone.

The emerging markets, on the other hand, were held back by fading optimism over China after its initial reopening-driven rally. Chinese equities were sharply lower in 2Q2023 as the economic rebound, following the country's reopening, started to cool. The best performing major equity market in local currency terms, both over the quarter and the first half of the year was Japan. The Yen weakened versus other major trading partners as interest rates remained low in Japan and the BoJ maintained its yield curve control policy to anchor government bond yields, while interest rates ratcheted higher in most other countries. This weakness in the Yen helped support Japanese stocks, many of which earn a significant proportion of their profit abroad.

The FBM KLCI dropped 3.2% in 2Q2023 to close at 1,377 making it one of the worst performing markets as investors took caution over the political uncertainties in the local market with the upcoming State Election. China's slower-than-expected economic recovery also soured sentiment as the expectation of spill-over effect to the region dampened. FBMKLCI dropping below a crucial 1,400 psychological support on 30th May coupled with persistent net foreign selling, the market near term outlook has turned negative. The 1Q2023 result season left much to be desired as the misses-to-beats ratio broadened to 4x from a generally balanced 4Q2022 result season. The only sector recording a positive gain during the quarter was Utilities while Energy, Healthcare and Industrial Products were the worst performers.

3.4 Market Outlook and Strategy

Our local Bursa Malaysia performance continued to disappoint despite the other equity market in the world recovered. The divergence in market performances clearly exhibit the decoupling of our equity market against the US equity market contrary to popular belief of a positive correlation. The index has declined 7.9% YTD and underperformed regional and most global equity markets which we attribute to a combination of weak corporate earnings, depreciation of the RM vs. the USD, and concerns over politics.

State elections are pending in 6 of the 13 states by 3Q2023 and the coalition government would need to at least maintain its majority in the Pakatan Harapan coalition states of Selangor, Negeri Sembilan and Penang, to reaffirm the longevity of the Federal Government, investor sentiment, and political will to implement the needed reforms.

Despite our gloomy local equity market, we remain sanguine for a potential recovery in the 4Q2023 due to reasons below:

- 1) FFR hike is at a tail's end and hence the widening of the FFR-OPR at a much slower pace should help arrest weaknesses on the local bourse.
- 2) Current FBMKLCI's earnings yield spread against 10-year MGS is still attractive to pose a threat of a flight from equity to fixed income.
- 3) Tourism angle still has legs to go as the targeted 16.1mil tourist arrivals still below the pre-pandemic 2019 number of 26.1m.
- 4) FBMKLCI valuation is looking attractive as both Price-to-Earnings and Price-to-Book valuation yardsticks appeared attractive at -1.5 SD and -2.0 SD respectively.

We also noticed a direct correlation between our local equities market and foreign inflows. The FBMKLCI as well as foreign shareholding on Bursa has been on a downtrend over the past decade. Rewinding back to its post-GFC high of 25.2% in May-13, foreign shareholding has since fallen to a record low currently (May-23: 20%).

Therefore, we expect a return in foreign shareholding inflow to possibly play out towards 4Q2023 as (i) domestically, the six state elections would be concluded by then and (ii) externally, a likely end to the Fed's rate upcycle should be reaffirmed during the Sep-23 FOMC meeting.

In conclusion, forward P/Es remain at a discount to the long-term mean although market headroom will be capped by unexciting earnings growth and persistent risks of further corporate earnings downgrades. We would focus on a defensive approach coupled with trading strategies to boost alpha and deploying excess cash on weakness in value names for medium term outperformance.

3.5 Distribution of Income

The fund did not declare any distribution of income for the financial period ended 30 June 2023.

3.6 Policy on Rebates and Soft Commissions

For the financial period under review, the Manager received a soft commission from brokers in the form of research materials. Any soft commissions received from the broker which are in the form of research material that assists in the decision-making process relating to the Fund's investment may be retained by the Manager. The soft commission received was for the benefit of the fund and there was no churning of trades. Any stock broking rebates received by the Manager will be directed to the account of the Fund.

3.7 Investment Allocation by Sector

Sector	Cost At	Purchase	Sold	Mark up/ down to	Value At

**11. NOTES TO THE UNAUDITED FINANCIAL STATEMENTS
FOR THE FINANCIAL PERIOD ENDED 30 JUNE 2023**

1. GENERAL INFORMATION

The Fund was constituted pursuant to the execution of a Deed dated 9 February 2012 and First Supplemental Deed dated 22 December 2022 between Permodalan BSN Berhad (“the Manager”), AmanahRaya Trustees Berhad (“the Trustee”) and registered unitholders of the Fund.

The principal activity of the Fund is to invest in a portfolio of equity, equity-related securities, debentures, money market instruments and any such other securities and/or instruments as may be determined by the Manager that comply with Shariah requirements. Any material change to the investment objective of the Fund would require the unitholders’ approval. The Fund commenced operation on 12 September 2012.

The Manager, a company incorporated in Malaysia, is a wholly-owned subsidiary of Bank Simpanan Nasional (“BSN”). The Manager is principally engaged in the management of unit trust funds and fund management activities. The registered office and principal place of business of the Manager is located at Tingkat 2, Blok A, Wisma Bank Simpanan Nasional, 117 Jalan Ampang, 50450 Kuala Lumpur.

These financial statements were authorized for issue by the Board of Directors of the Manager in accordance with a resolution of directors on 24 August 2023.

2. BASIS OF PREPARATION OF THE FINANCIAL STATEMENTS

The financial statements of the Fund have been prepared in accordance with Malaysian Financial Reporting Standards (“MFRSs”), International Financial Reporting Standards and the relevant Securities Commission (“SC”) Malaysia guidelines.

Adoption of Amendments to MFRSs

In the current financial period, the Fund adopted all the Amendments to MFRSs issued by Malaysian Accounting Standards Board (“MASB”) that are relevant to its operations and effective for annual financial periods on or after 1 January 2022 as follows:

Amendments to MFRS 3	Reference to Conceptual Framework
Amendments to MFRS 16	COVID-19-Related Rent Concessions beyond 30 June 2021
Amendments to MFRS 116	Property, Plant, and Equipment - Proceeds before Intended Use
Amendments to MFRS 137	Onerous Contracts - Costs of Fulfilling a Contract
Annual Improvements to MFRS Standards 2018 - 2020	

The adoption of the above does not give rise to any material financial effects on the financial statements of the Fund.

BSN DANA DIVIDEN AL-IFRAH

New MFRS and Amendments to MFRSs in Issue but Not Yet Effective

At the date of authorisation for issue of these financial statements, the new MFRS and Amendments to MFRSs which were in issue but not yet effective and not early adopted by the Fund are as listed below:

Amendments to MFRS 10 and MFRS 128	Sale or Contribution of Assets between an Investor and its Associate or Joint Venture ⁴
Amendments to MFRS 16	Lease Liability in a Sale and Leaseback ³
MFRS 17	Insurance Contracts ²
Amendments to MFRS 17	Insurance Contracts ²
Amendments to MFRS 17	Initial Application of MFRS 9 and MFRS 17 - Comparative Information ²
Amendments to MFRS 101	Classification of Liabilities as Current or Non-current ²
Amendments to MFRS 101	Disclosure of Accounting Policies ²
Amendments to MFRS 101	Non-current Liabilities with Covenants ³
Amendments to MFRS 108	Definition of Accounting Estimates ²
Amendments to MFRS 112	Deferred Tax related to Assets and Liabilities arising from a Single Transaction ²

¹ Effective for annual periods beginning before 1 January 2023

² Effective for annual periods beginning on or after 1 January 2023, with earlier application permitted.

³ Effective for annual periods beginning on or after 1 January 2024, with earlier application permitted.

⁴ Effective date defer to a date to be determined and announced by MASB.

The Manager of the Fund anticipates that the abovementioned applicable new MFRS and Amendments to MFRSs will be adopted in the annual financial statements of the Fund when they become effective. The adoption of these applicable new MFRS and Amendments to MFRSs will have no material impact on the financial statements of the Fund in the period of initial application.

3. SIGNIFICANT ACCOUNTING POLICIES

3.1 Basis of Accounting

The financial statements of the Fund have been prepared under the historical cost convention except for certain financial assets and financial liabilities which are measured at fair values as explained in the accounting policies below. Historical cost is generally based on the fair value of the consideration given in exchange for assets.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Fund takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date.

Fair value for measurement and/or disclosure purposes in these financial statements is determined on such a basis, except for share-based payment transactions that are within the scope of MFRS 2 *Share-based Payment*, leasing transactions that are within the scope of MFRS 16 *Leases*, and measurements that have some similarities to fair value but are not fair value, such as net realisable value in MFRS 102 *Inventories* or value-in-use in MFRS 136 *Impairment of Assets*.

In addition, for financial reporting purposes, fair value measurements are categorised into Level 1, 2 or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
- Level 3 inputs are unobservable inputs for the asset or liability.

The principal accounting policies adopted are set out below.

3.2 Functional and Presentation Currency

The financial statements are measured using the currency of the primary economic environment in which the Fund operates ("functional currency"). The financial statements are presented in Ringgit Malaysia ("RM"), which is also its functional currency.

3.3 Financial Instruments

(i) Recognition and Initial Measurement

A financial asset or a financial liability is recognised in the statement of financial position when, and only when, the Fund becomes a party to the contractual provisions of the instrument.

A financial asset (unless it is a trade receivable without significant financing component) or a financial liability is initially measured at fair value plus or minus, for an item not at fair value

through profit or loss ("FVTPL"), transaction costs that are directly attributable to its acquisition or issuance.

(ii) Financial Instrument Categories and Subsequent Measurement

Financial assets

Categories of financial assets are determined on initial recognition and are not reclassified subsequent to their initial recognition unless the Fund changes its business model for managing financial assets in which case all affected financial assets are reclassified on the first day of the first reporting period following the change of the business model.

(a) Amortised cost

Amortised cost category comprises financial assets that are held within a business model whose objectives is to hold assets to collect contractual cash flows and its contractual terms give rise on specified dates to cash flows that are solely payments of principal and profit on the principal amount outstanding. The financial assets are not designated as FVTPL. Subsequent to initial recognition, these financial assets are measured at amortised cost using the effective profit method. The amortised cost is reduced by impairment losses. Profit income, foreign exchange gains and losses and impairment are recognised in profit or loss. Any gain or loss on derecognition is recognised in profit or loss.

The effective profit method is a method of calculating the amortised cost of a financial asset and of allocating the profit income over the relevant period. The effective profit rate is the rate that exactly discounts the estimated future cash receipts through the expected life of the financial instrument or a shorter period, where appropriate, to the net carrying amount of the financial asset. The calculation takes into account all contractual terms of the financial instruments but does not consider future credit losses. Significant fees and transaction costs integral to the effective profit rate, as well as premiums or discounts are also considered.

(b) Fair value through profit or loss ("FVTPL")

All financial assets not measured at amortised cost as described above are measured at FVTPL. On initial recognition, the Fund may irrevocably designates a financial asset that otherwise meets the requirements to be measured at amortised cost as at FVTPL if doing so eliminate or significantly reduces an accounting mismatch that would otherwise arise.

Financial assets categorised at FVTPL are subsequently measured at their fair value. Net gains or losses, including any profit or dividend income, are recognised in the profit or loss.

All financial assets, except for those measured at FVTPL, are subject to impairment assessment.

Financial Liabilities

Financial liabilities are classified as measured at amortised cost.

A financial liability is any liability with contractual obligation to deliver cash or another financial asset to another enterprise, or to exchange financial instruments with another enterprise under conditions that are potentially unfavourable.

(a) Financial Liabilities Measured Subsequently at Amortised Cost

Financial liabilities that are not held for trading, or designated as at FVTPL, are measured subsequently at amortised cost using the effective cost method.

The effective cost method is a method of calculating the amortised cost of a financial liability and of allocating profit charges over the relevant period. The effective charges is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective charges, transaction costs and other premiums or discounts) through the expected life of the financial liability, or (where appropriate) a shorter period, to the amortised cost of a financial liability.

The Fund's significant other financial liabilities include accrued expenses, amounts owing to a broker, Manager and Trustee which are initially measured at fair value and subsequently measured at amortised cost.

(iii) Derecognition

A financial asset or a part of it is derecognised when, and only when the contractual rights to the cash flows from the financial asset expire or the financial asset is transferred to another party without retaining control or substantially all risks and rewards of the asset. On derecognition of a financial asset, the difference between the carrying amount and the sum of the consideration received (including any new asset obtained less any new liability assumed) and any cumulative gain or loss that had been recognised in Shariah-compliant equity is recognised in profit or loss.

A financial liability or a part of it is derecognised when, and only when, the obligation specified in the contract is discharged or cancelled or expires. On derecognition of a financial liability, the difference between the carrying amount of the financial liability extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognised in profit or loss.

(iv) Offsetting

Financial assets and financial liabilities are offset and the net amount presented in the statement of financial position when, and only when, the Fund currently has a legally enforceable right to set off the amounts and it intends either to settle them on a net basis or to realise the asset and liability simultaneously.

3.4 Impairment of Financial Assets

The Fund assesses at the end of each reporting period whether there is any objective evidence that a financial asset is impaired.

The measurement of expected credit losses ("ECL") is a function of the probability of default, loss given default (i.e. the magnitude of the loss if there is a default) and the exposure at default. The assessment of the probability of default and loss given default is based on historical data adjusted by forward-looking information. As for the exposure at default, for financial assets, this is represented by the financial assets' gross carrying amount at the end of each reporting year. The impairment methodology applied depends on whether there has been a significant increase in credit risk.

BSN DANA DIVIDEN AL-IFRAH

The Fund applies the simplified approach under MFRS 9 which requires expected lifetime loss to be recognised from initial recognition. The expected loss allowance is based on provisional matrix.

3.5 Provisions

Provisions are recognised when the Fund has a present legal or constructive obligation as a result of past events, when it is probable that an outflow of resources will be required to settle the obligation, and when a reliable estimate of the amount of the obligation can be made. Provisions are measured at the best estimate of the amount required to settle the obligation at the end of the reporting period, and are discounted to present value where the effect is material.

At the end of each reporting period, provisions are reviewed and adjusted to reflect the current best estimate. Provisions are reversed if it is no longer probable that the Fund will be required to settle the obligations.

3.6 Unitholders' Contribution

The unitholders' contribution of the Fund meets the definition of puttable instruments and is classified as equity instruments.

Instruments classified as equity are measured at cost and are not remeasured subsequently.

Distribution equalisation is accounted for at the date of creation and cancellation of units of the Fund. It represents the average amount of distributable income or loss included in the creation and cancellation prices of units.

3.7 Net Asset Value Attributable to Unitholders

Net asset value attributable to unitholders represents the redemption amount that would be payable if the unitholders exercised the right to redeem units of the Fund at the end of the reporting period.

3.8 Income Recognition

Realised gain or loss on disposal of investments represents the difference between the net disposal proceeds and the carrying amount of the investments, computed on the weighted average cost basis.

Unrealised gains or losses comprise changes in the fair value of financial instruments for the reporting period.

Dividend income from investments is recognised when the right to receive dividend payment is established.

Profit income from Islamic deposits is recognised on a time proportion basis that reflects the effective yield on the asset.

3.9 Income Tax

There is no tax charge as profit income derived by the Fund is exempted pursuant to Paragraph 35 and 35A, Schedule 6 of the Income Tax Act, 1967. Gains arising from realisation

BSN DANA DIVIDEN AL-IFRAH

of investments are not treated as income pursuant to Paragraph 61(1)(b) of the Income Tax Act, 1967.

Pursuant to Public Ruling No. 7/2013 in Unit Trust Funds and Paragraph 12B, Schedule 6 of the Income Tax Act, 1967, single-tier dividends distributed by a resident company will be exempted from tax in Malaysia.

Pursuant to Public Ruling No. 5/2017 Taxation of Unit Holders of Real Estate Investment Trust/Property Trust Funds, unit holders are not required to declare the income from REIT as the tax withheld is a final tax.

3.10 Classification of Realised and Unrealised Gains and Losses

Unrealised gains and losses comprise changes in the fair value of financial instruments for the period and from reversal of prior period's unrealised gains and losses for financial instruments which were realised (i.e. sold, redeemed or matured) during the reporting period.

Realised gains and losses on disposals of financial instruments classified at FVTPL are calculated using the weighted average method. They represent the difference between an instrument's initial carrying amount and disposal proceeds.

3.11 Dividend Distributions

Dividend distributions are at the discretion of the Fund. A dividend distribution to the Fund's unitholders is accounted for as a deduction from realised reserves except where dividend is sourced out of distribution equalisation which is accounted for as a deduction from unitholders' contribution. The amount is either refunded to unitholder by way of distribution and/or adjusted accordingly when units are cancelled.

A proposed dividend distribution is recognised as a liability in the period in which it is approved.

3.12 Operating Segments

For management purposes, the Fund is organised into one main operating segment, which invests in various types of Shariah-compliant equity investments and Islamic deposits. All of the Fund's activities are interrelated, and each activity is dependent on the others. Accordingly, all significant decisions are based upon analysis of the Fund as one segment. The financial results from this segment are equivalent to the financial statements of the Fund as a whole.

3.13 Statement of Cash Flows

The Fund adopts the direct method in the preparation of statement of cash flows.

Cash and cash equivalents consist of bank balances and Islamic deposits, highly liquid investments with maturities of three months or less from the date of acquisition and are readily convertible to cash with insignificant risk of changes in value.

4. CRITICAL ACCOUNTING JUDGEMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY

Estimates and judgements are continually evaluated by the Manager and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

4.1 Critical judgements in applying accounting policies

In the process of applying the Fund's accounting policies, which are described in Note 3 above, the Manager is of the opinion that there are no instances of application of judgement which are expected to have a significant effect on the amounts recognised in the financial statements.

4.2 Key sources of estimation uncertainty

The Manager believes that there are no key assumptions made concerning the future, and other key sources of estimation uncertainty at the end of the reporting period, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

BSN DANA DIVIDEN AL-IFRAH

BSN DANA DIVIDEN AL-IFRAH

15. UNITS HELD BY THE MANAGER AND RELATED PARTIES

As of the end of the reporting period, the total number and value of units held by the Manager and related parties are as follows:

	30.06.2023		31.12.2022	
	Number of units	Value at NAV RM	Number of units	Value at NAV RM
Bank Simpanan Nasional (Holding company of the Manager)	254,234,043	43,397,751	254,234,043	44,872,309
Permodalan BSN Berhad (the Manager, wholly-owned by BSN)			26,306	4,643
	<u>254,234,043</u>	<u>43,397,751</u>	<u>254,260,349</u>	<u>44,876,952</u>

The directors of the Manager are of the opinion that the transactions with the related parties have been entered into in the normal course of business and have been established on terms and conditions that are not materially different from that obtainable in transactions with unrelated parties.

16. TOTAL EXPENSE RATIO

The total expense ratio of the Fund for the financial period ended 30 June 2023 is 1.41% (2022: 2.20%). It is the ratio of all the fees deducted from the Fund including management fee, Trustee's fee, auditors' remuneration, tax agent's fee plus expense charged to the Fund expressed as a percentage of the Fund's average NAV, calculated on a daily basis.

17. PORTFOLIO TURNOVER RATIO

The portfolio turnover ratio of the Fund for the financial period ended 30 June 2023 is 1.58 times (2022: 0.54 times). It is the ratio of average of the total acquisitions and disposals of investment in the Fund to the average NAV of the Fund, calculated on a daily basis.

18. OPERATING SEGMENTS

The Investment Committee of the Manager, being the operating decision-maker, makes the strategic decision on the resource allocation of the Fund. The decisions are based on an integrated investment strategy to ensure the Fund achieves its targeted return with an acceptable level of risk within the portfolio.

The Investment Committee is responsible for the performance of the Fund by investing a minimum of 70% of the Fund's NAV in Shariah-compliant stocks and shares of companies quoted on Bursa Securities. The Fund will also invest up to 30% of the Fund's NAV in liquid assets including Islamic money market instruments and Islamic deposits.

BSN DANA DIVIDEN AL-IFRAH

On this basis, the Investment Committee considers the business of the Fund to have a single operating segment located in Malaysia. Asset allocation decisions are based on a single, integrated investments strategy and the Fund's performance is evaluated on an overall basis.

The internal reporting provided for the Fund's assets, liabilities and performance is prepared on a consistent basis with the measurement and recognition principles of MFRS and IFRS.

There were no changes in the reportable operating segments during the financial year.

19. FINANCIAL RISK MANAGEMENT

FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES

Categories of Financial Instruments

	30.06.2023	31.12.2022

Amount owing to Trustee	2,226	2,281
	<u>752,783</u>	<u>565,106</u>

The Fund's activities are exposed to market risk, credit risk and liquidity risk. The Fund's overall financial risk management policy focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Fund's financial performance.

Financial risk management is carried out through policy reviews, internal control systems and adherence to the investment powers and restrictions stipulated in the SC's Guidelines on Unit Trust Funds in Malaysia.

BSN DANA DIVIDEN AL-IFRAH

(a) Market Risk

Market risk arises due to changing market conditions as a result of regulatory, political, economic and business environment. Such changes can result in stock market fluctuations which may affect the Fund's underlying investments which will cause the NAV of the Fund to fall or rise. Market risk cannot be eliminated but may be reduced through diversification. The Manager diversify the portfolio and monitor the investment climate and market conditions to take measures, where necessary and appropriate, to mitigate this risk.

Price Risk

Price risk is the risk that the fair values of equity securities decrease as a result of changes in the level of equity indices and the value of individual securities. It is the Fund's policy to maximise returns for the least amount of risk and the Manager selects securities that are fundamentally sound with good growth potential.

The Fund's Shariah-compliant securities are susceptible to market price risk arising from uncertainties about future prices of the instruments. The Fund's overall market position is monitored on a daily basis by the Fund's Investment Manager.

The Fund only invests in Shariah-compliant securities issued in Malaysia and the Fund's market price risk is managed through diversification of the investment portfolio ratios by exposures.

The table below shows the diversification of the Fund's investment portfolio as at the end of the reporting period.

30.06.2023

Industry	RM	% NAV
Construction	695,966	1.60
Consumer products and services	3,820,459	8.80
Energy	3,678,491	8.47
Financial services	4,440,252	10.23
Industrial products and services	3,458,085	7.96
Plantation	1,386,441	3.19
Property	1,833,634	4.22
REIT	2,290,025	5.27
Technology	4,500,868	10.35
Telecommunication and media	1,526,698	3.51
Transportation and logistics	1,285,936	2.96
Utilities	3,267,692	7.52
	<u>32,184,547</u>	<u>74.08</u>

31.12.2022

Industry	RM	% NAV
Construction	1,855,027	4.13
Consumer products and services	3,253,782	7.23
Energy	2,837,212	6.31
Financial services	4,393,744	9.77
Health care	353,320	0.79
Industrial products and services	3,259,658	7.25
Plantation	619,650	1.38
Property	2,026,763	4.51
REIT	2,562,442	5.70
Technology	2,807,113	6.25
Telecommunication and media	3,698,430	8.23
Transportation and logistics	1,965,750	4.37
Utilities	6,879,949	15.31
	36,512,840	81.25

The overall market position is monitored on a daily basis by the Manager. The Manager will determine which industry may benefit from current and future changes in the economy when undergoing the process of sector allocation. The value of the Fund's investments in ordinary shares issued by any single issuer must not exceed 10% of the Fund's daily NAV.

If prices for quoted Shariah-compliant investments as at the end of the reporting period strengthened by 5% with all other variables being held constant, the Fund's profit before taxation and NAV would have increased by RM1,609,227. A 5% weakening in the quoted prices would have had an equal but opposite effect on the profit before taxation and NAV respectively. This is for illustration purpose only and is not an indication of future variances.

The Manager has in place a system for the monitoring of the Fund's transactions to ensure compliance with the SC's Guidelines on Unit Trust Funds in Malaysia and the Fund's limits and investment restrictions in accordance with the parameters in the Deed.

(b) Credit Risk

Credit risk refers to the inability of an issuer or a counterparty to make timely payments of profit, principal and proceeds from realisation of investments.

Credit risk arising from placements of Islamic deposits in licensed financial institutions is managed by ensuring that the Fund will only place deposits in reputable licensed financial institutions.

For amount owing from broker, the settlement terms are governed by the relevant rules and regulations as prescribed by Bursa Securities. All transactions in listed Shariah-compliant securities are settled/paid for upon delivery using approved brokers. The risk of default is considered minimal, as delivery of Shariah-compliant securities sold is only made once the broker has received payment. Payment is made on a purchase once the Shariah-compliant securities have been received by the broker. If either party fails to meet their obligation, the trade will fail.

BSN DANA DIVIDEN AL-IFRAH

The settlement terms of the proceeds from the creation of units receivable from the Manager and redemption of units payable to the Manager are governed by the SC's Guidelines on Unit Trust Funds in Malaysia.

The maximum exposure to credit risk before any credit enhancements as at the end of the reporting period is the carrying amount of the financial assets as set out below:

	30.06.2023	31.12.2022
	RM	RM
Islamic deposits with licensed financial institutions	11,893,000	6,490,000
Dividend receivables	89,207	243,215
Profit income receivables	19,216	14,248
Amount owing from broker	-	2,238,014
Bank balances	14,429	5,725
	<u>12,015,852</u>	<u>8,991,202</u>

(c) Liquidity Risk

Liquidity risk is the risk that the Fund may not be able to generate sufficient cash resources to settle its obligations in full as they fall due or can only do so on terms that are materially disadvantageous.

The Fund maintains sufficient level of liquid assets with minimum level of 10% of the NAV of the Fund to meet anticipated payments and cancellation of units by unitholders. Islamic money market instruments which include Islamic term deposits, Islamic repurchase agreements and short term cash placements with licensed financial institutions, will be used to maintain the Fund's liquidity position and as a short term alternative measure when the equity market experiences excessive volatility.

The Fund shall not borrow in connection with its activities or lend any of its cash or investments unless permitted by the SC's Guidelines on Unit Trust Funds in Malaysia and any Guidance Notes issued by the SC from time to time or other laws or regulations pertaining to unit trusts.

As of the current and previous financial year, all the financial liabilities of the Fund are due on demand or within one year from the end of the reporting period.

(d) Capital Risk Management

The Manager is responsible for identifying and controlling risks. The Board of Directors of the Manager is ultimately responsible for the overall risk management approach within the Fund.

Monitoring and controlling risk are primarily set up to be performed based on limits established by the Manager and the Trustee. These limits reflect the investment strategy and market environment of the Fund's investments as well as the level of the risk that the Manager is willing to accept. In addition, the Manager monitors and measures the overall risk bearing capacity in relation to the aggregate risk exposure across all risk type and activities.

BSN DANA DIVIDEN AL-IFRAH

The Fund has investment guidelines that set out its overall business strategies, its tolerance for risk and its general risk management philosophy. The Manager also has a Compliance Department to ensure that the Fund complies with the various regulations and guidelines stipulated in its Trust Deed, the SC's Guidelines on Unit Trust Funds in Malaysia.

It is, and has been throughout the current and previous financial year, the Fund's policy that no derivatives shall be undertaken for either investment risk management purposes.

The capital is represented by unitholders' subscription to the Fund. The amount of capital can change significantly on a daily basis as the fund is subject to daily redemption and subscription at the discretion of unitholders. The Manager manages the Fund's capital in accordance with its objective, while maintaining sufficient liquidity to meet unitholders' redemption.

20. FINANCIAL RISK MANAGEMENT

Except as detailed in the table below, the carrying amounts of the financial assets and financial liabilities as reported in the statement of financial position as at 30 June 2023 and 31 December 2022 approximate their fair values due to the relatively short-term nature of these financial instruments.

Fair value hierarchy

The table below analyses financial instruments carried at fair value, by valuation method. The different levels have been defined as follows:

- Level 1 fair value measurements are those derived from quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 fair value measurements are those derived from inputs other than quoted prices included within Level 1 that are observable for the assets or liabilities, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3 fair value measurements are those derived from valuation techniques that include inputs for the assets or liabilities that are not based on observable market data (unobservable inputs).
